Enterprise-Ready Al Solutions in Weeks, Not Months

Who we are

We specialize in Al and Machine Learning, leveraging state-of-the-art technologies to **build intelligent, secure, and scalable solutions** that drive innovation and operational excellence.

Unlike traditional Al projects that take months, our **proven Al frameworks and pre-built components** allow us to deliver **production-ready Al solutions in weeks.** We help businesses:

- Doost productivity with Al-powered automation
- Make smarter decisions through predictive analytics & RAG-based knowledge retrieval
- © Seamlessly integrate Al into existing workflows & cloud environments
- © Ensure enterprise-grade security & compliance

Our team excels in LLMs, NLP, Knowledge Graphs, Vector Databases, Multimodal AI, and AI Agents, ensuring that your organization stays ahead in the AI revolution.

Our **AI & Machine Learning** Capabilities

1. Retrieval-Augmented Generation (RAG) & Enterprise Al Search

We enhance LLM-powered Al applications with context-aware, high-accuracy information retrieval:

RAG Pipelines

Vector Search & Embeddings

Enterprise Knowledge Graphs

Enabling Al models to retrieve and generate responses based on structured & unstructured data

Using Neo4J, Pinecone, Weaviate for fast, context-rich Al retrieval Structuring complex business data to power Al-driven insights

2. NLP, Entity Recognition & Al-Powered Understanding

Our Natural Language Processing (NLP) expertise enables businesses to extract meaning, automate workflows, and enhance interactions:

Mamed Entity Recognition (NER)

Automating data extraction, compliance checks, and insights generation

Sentiment Analysis & Intent Detection

Al-driven understanding of customer feedback, support tickets, and interactions

Al-Powered Document Processing

Extracting key insights from contracts, invoices, and unstructured text

3. Al-Powered Automation & Intelligent Agents

We build autonomous Al agents that optimize operations and reduce manual work:

Conversational Al & Chatbots

Using LangChain, LLMs, Flowise for natural, voice & text interactions

Workflow Automation Agents

Al-powered assistants that handle task execution, scheduling, and decision-making

Multimodal Al Solutions

Combining text, image, audio, and video to enhance Al-powered applications

4. Custom Model Training, MLOps & Scalable Al Infrastructure

We provide full-scale Al model development & deployment with:

Fine-Tuning & Custom LLM Training

Adapting GPT, LLaMA, Mistral, and Claude models to business-specific needs

Oustom model training

Leverage the power of your data using custom made models for: Classification, Machine vision, Pattern identification, Forecasting.

Integrate state of the art tried and tested models into your workflows

MLOps & Al CI/CD Pipelines

Automating model deployment with Kubeflow, MLflow, Hugging Face

O Cloud & Edge Al Deployments

Running Al workloads on AWS SageMaker, Azure Al, Google Vertex Al or on-prem

5. Predictive Analytics & Al Decision-Making

We leverage Al-driven insights to enhance business operations:

Time-Series Forecasting

Al-powered predictions for sales, demand planning, and risk management

One of the Contract of the Co

Real-time identification of suspicious activities in finance, insurance, and security

One of the Commender Systems

Personalizing user experiences with data-driven Al recommendations

Industries We Serve

Healthcare & Pharma

Finance & Insurance

eCommerce & Retail

Al-assisted diagnostics, patient insights, and drug discovery

Risk assessment, fraud detection, and automated underwriting

Smart recommendations, inventory forecasting, and AI chatbots

EdTech & Learning

Real Estate & PropTech

Al-enhanced education, tutoring, and automated content analysis

Al-powered property valuation, lead scoring, and smart search

Why Choose **₹EPWERY**?

Enterprise-Ready Al in Weeks

Deploy Al solutions quickly & efficiently

End-to-End AI & ML Solution

From model training to production deployment

RAG, NER, and Knowledge Graph Expertise

Advanced AI techniques for data-rich applications

Proven Al Framework

We don't start from scratch—our pre-built Al modules accelerate implementation

Cloud, On-Prem & Edge Al

Deploy Al securely in any environment

Let's Build Al That Works for Your Business-Fast

We deploy **proven Al strategies and enterprise-ready solutions** to boost productivity, enhance decision-making, and automate processes **in weeks, not months.**

Let's talk
